Easy clean treatment with nano coating

Nano Technology
Easy Cleaning
Anti-mildew
Germ resistant

NanoCoat glass treatment resists water and dirt build up to keep bath and shower doors looking like new. No need for harsh cleaners, just wipe clean with a soft towel. Therefore using nano coated glass can reduce frequency of cleaning, extend glass life circle, save labor and detergent.

Nano coating glass is a special nano technology product with a Long-term hydrophobic effect on glass surfaces by applying nano coating onto glass to form a surface protection that can reduce static electricity effect, prevent glass from adsorbing dirt and keep glass surface clean.
